

## Jim Coleman MA Political Economy 1989, MSc Political Economy 1990

Jim Coleman is a Director and Head of Economics at global advisory and engineering firm WSP. An expert in urban economics with almost 30 years' experience, Jim is highly skilled at envisioning economic futures for cities and regions based on specialised sectors and industry strengths, low carbon innovation and urban technology.

Jim provides expert economic advice to public bodies internationally including national governments, urban development companies, municipal authorities and international development agencies, including the World Bank and the UK Foreign, Commonwealth & Development Office (FCDO). His focus is on the economic resilience of cities, low carbon transitions, urban competitiveness, industrial transformation, urban revitalization and labour markets.

He is a specialist in the economics and planning of special economic zones (SEZs), innovation districts and large-scale economic infrastructure projects such as ports, airports, renewable energy systems and multi-modal transport.

Throughout his career Jim has worked for a number of major firms in urban development, engineering and the built environment, including BuroHappold, Aecom, Hatch Regeneris and DTZ (now Cushman & Wakefield). He started his career as an academic in the Economics Department of Durham University, and is still active in higher education, as a Professor of Professional Practice in the School Architecture and Cities, University of Westminster.

Jim is passionate about securing zero carbon pathways to economic prosperity and is a regular contributor to the UK Government's All Party Parliamentary Group on Net Zero.
