

**Getting to the bottom of my bahookie by Chiara Watt aged 9 (P4)**

I'm glad I have a bahookie and not a bottom because bahookie makes me laugh and it sounds sillier than boring little bottom. It makes me happier when the teacher says to me 'Sit on your bahookie!' because she sounds like she is in a good mood.

I think my bahookie is bigger and better than my bottom because it shoogles more and I think that bottoms should get a more important name like bahookie.

I think that bahookie sounds more exciting and expressive than bottom. Bottoms are hard and uncomfortable to sit on, especially during assemblies. Bahookies are much more comfortable and soft.

In Italian you say 'sedere' for bottom, but I still think bahookie sounds better and comfier.
